Re: Proceeding 17-108

Dear Commissioners:

Thank you for undertaking your proceeding on Restoring Internet Freedom. This is a critical discussion and we appreciate the FCC taking the opportunity to weigh the complex issues surrounding Net Neutrality.

The California Technology Council is an industry development organization supporting innovators from all industry sectors. We both support and appreciate the FCC approach to this Proceeding, which has prompted a national conversation.

As you will find from our attached viewpoint, we find that the issues implicated in the Restoring Internet Freedom dialogue are far-reaching across the economy, society, education, and industry. In our view, the result of this Proceeding should be a comprehensive reform process undertaken in Congress.

Thank you for stimulating such an important conversation in American technology policy.

Sincerely,

Matt Gardner
Chief Executive Officer
California Technology Council
